

## Template Research Proposal: Radiology Department

### **Directions:**

- Submit to Research Committee, Gary H. Glover, Ph.D, Chairman (via Donna Cronister MC5488, fax 3-5795, donna@s-word).
- During the Committee's review of the proposal, the applicant will normally be present to answer questions.
- Review considerations include scientific merit, degree to which research will lead to further (funded) academic pursuit, educational/training opportunities for faculty/house staff, and degree of support required.

Successful candidates using Lucas facilities will be required to fill out a Lucas User Contract Form giving details of human and animal use approvals, investigators, etc.

### **Deadline:**

- The proposals must be received in Dr. Glover's office by the 10th of each month.
- The Research Committee will be convened within two weeks and the committee's recommendation will be communicated to the principal investigator within 3 days of the meeting.
- Please note that the principal investigator or representative will need to attend the meeting in the event the committee needs further information.

### **I. Administrative Data:**

1. Project Title:
2. Principal Investigator (include email if used):
3. Other key personnel:
4. Project Funding available: ( ) No ( ) Yes. *Important:* If this is a pilot study for a project which is anticipated to continue, supply plans for seeking long-term funding.
5. Human Subjects Use: ( ) No ( ) Yes. IRB approval submitted/obtained (date):
6. Animal Use: ( ) No ( ) Yes. APLAC approval submitted/obtained (date):

### **II. Brief description ( 2 pages) of proposed research:**

1. Goals of Research
2. Background and significance
3. Preliminary Results (If available)
4. Research Methods  
Research design, including data acquisition and analysis techniques.  
Include duration of project, estimated scan hours, etc.

### **III Facilities and Personnel support required for project completion:**

Equipment, supplies, training, scan support, etc.

- ### **IV. Within 6 months upon completion of project, the principal investigator is expected to hold a research symposium to convey his results to Department faculty, housestaff and research staff. Donna Cronister will contact you to set up this conference. It is also suggested that you inform Dr. Glover of any publications which have resulted from this research opportunity.**
